Hiring Committee

Student Wellness and Recreation Center

California State University, Long Beach

Long Beach, CA

Dear Hiring Committee,

I am writing to express my enthusiastic interest in the Building Manager Student Assistant position at the Student Wellness and Recreation Center (Requisition ID: 1780). As a committed and proactive Computer Science undergraduate at CSULB, I am eager to bring my leadership experience, technical problem-solving skills, and customer service strengths to support the SRWC's operations and enhance the on-campus experience for students and visitors alike.

During my recent role as a Summer Conference Assistant at CSULB, I successfully coordinated over 800 guest check-ins, optimized event logistics, and ensured high-quality customer service - experiences that align closely with the SRWC Building Manager's responsibilities in facilities oversight and operational support. My ability to manage high-traffic environments while maintaining attention to detail and a service-oriented mindset has prepared me to effectively open/close facilities, handle incident reports, monitor building systems, and support fellow student staff.

In addition to my operational background, I serve as the Webmaster for SHPE at CSULB, where I lead website management for 800+ active members. This has enhanced my organizational communication, responsiveness, and collaborative problem-solving abilities - key traits for managing events, addressing building issues, and modeling leadership for peers. I am also trained in tools such as Google Cloud, Python, and various developer platforms, bringing a technologically adept perspective to troubleshooting tasks, especially those involving AV equipment.

I am certified in CPR/First Aid/AED (or am prepared to complete certification within 30 days), highly adaptable to changing shifts and responsibilities, and excited to take on a visible leadership role that fosters safety, engagement, and inclusivity at the SRWC. I am available for evening and weekend shifts as required and am eager to contribute to a dynamic team that prioritizes student well-being and community engagement.

Thank you for considering my application. I look forward to the opportunity to speak further about how my background and commitment to service align with the goals of the SRWC.

Warm regards,

Divyanshu Mehta
